

REVO-S C2 ROTARY FILLER CAPPER

EDIBLE OILS

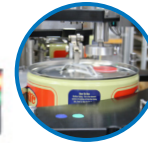

PRESSURIZED TANK

- > Smaller tank
- > Consistent product flow rate even with viscosity variations
- > Reduced amount of wasted product
- > More economical cleaning
- > Possibility to pressurize the tank with Nitrogen

CLEANING SYSTEM

- > Personalized cleaning programs
- > Volume reduction of effluents

CAPPING SYSTEM

- > Compact capping system
- > 2 capping heads
- > Checking for cap presence and correct positioning

Food Certificate

OUTPUTS

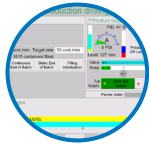

- > Up to 40 CPM

CONTAINERS

- > from 500ml to 20L

CAPS

- > screw cap, flexspout, push on cap

HMI

- > Traceability
- > User-friendly interface
- > Programmable recipes
- > Maintenance indicators

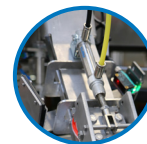

FILLING

- > No drips
- > Weight-filling system
- > Legal Metrology available
- > Very high accuracy
- > Weighing accuracy not affected by temperature variations
- > Product savings due to no overfilling

TOOLING SYSTEM

- >>«Click & Play»® system
- > Dedicated color tooling for specific containers
- > Tooling switch requires no tools
- > Quick tooling changeovers

NITROGEN PURGING

- > Option available
 - product protection
 - prevention of container collapse
