

## SEMI-AUTOMATIC FILLER CAPPER FLEXEO-S

### FILLING

- › 1 or 2 filling heads
- › No drips
- › Weight-filling system
- › Legal Metrology available

### CAPPING SYSTEM

- › Semi-automatic or automatic (in option)

### BENEFITS

- › Flexible equipment
- › Compact design
- › Few tools
- › Multi format machine
- › Rapid changeover to other container sizes
- › Easy operation by one person
- › Very high accuracy
- › Weighing accuracy not affected by temperature variation

The FLEXEO-S is a semi-automatic filling machine for the precise filling of liquids (they can also be viscous and pasty). Many types of products are compatible with this filling machine.

This system can be used to fill all types of standard containers, e.g. bottles, jerrycans, buckets, cans. The product is fed from storage tanks located higher up and uses gravity or pumps. The connection is made through product hoses directly to the valve.

Many configurations and options are available.

### OPTIONS

- › Automatic capping
- › Nitrogen
- › Motorized conveyor
- › Lid press closing or crimping for pail
- › Labeller
- › Fully automatic palletization system

Paint

Agrochemicals

Chemicals

Petrochemicals

Vegetable oils

Food

Explosion proof design
